

*Hold Onto Your Butts Before
They Get A Hold On The
Environment*

Cigarette butts are discarded each year on streets and sidewalks. When it rains, rainwater carries them into our local stormwater ponds, ditches and the Red River.

FACT

Cigarette butts are not biodegradable. It can take over 15 years to break them down, all the while releasing the toxic chemicals contained in the filters.

Please hold onto your cigarette butts until they can be disposed of properly.

Become part of the solution not the problem.

Only Rain in the Storm Drain!
